Supply & Install\*

**Available at Coppertop | Geoff 021 2491395 | [www.coppertop.co.nz](http://www.coppertop.co.nz)**

Applies to products as shown in this flyer. Not valid with any other offer. Prices include supply of the unit and associated plumbing & electrical work. \*Conditions apply to installation inclusive price and is subject to a site visit and confirmation the proposed location of the filter is suitable. If the location is not suitable further charges may apply. Offer valid until 29th February 2024.

HYBRID-G9

### Whole House Protection

The Hybrid G9 system reduces sediment, silt, sludge, dirt, rust, fine particles and is highly effective in eliminating bacteria and parasites in your water.

Suited to medium to large applications that requires higher capacity and longer life filter cartridges. This system is designed for both mains and rainwater supply. This unit features a weather protection cover that is suitable for outdoor installation and an anti-tamper & childproof lockable lid.

HYBRID-G13

### Mains to Rains Whole House

The Hybrid G13 system has all the features of the G9 system plus it incorporates an additional filtration stage for the added benefit of taste, odour, chlorine & chemical reduction and an increase in capacity.

The Hybrid G13 is ideal for use with mains to rain switch-over systems with its dual sediment cartridges and dedicated carbon block cartridge.

SOL40-E3

### Water Softener System

Do you have hard water?

The Softrol™ SOL series has been designed specifically for hard water and WaterMark approved to reduce scaling and spotting in your home or building.

Hard water is water that contains dissolved minerals such as limestone, iron, sulphur, magnesium and calcium. If these minerals are not removed from your water, they will cause scaling, eventually blocking plumbing and shortening the life of appliances - particularly hot water units, dishwashers, washing machines, etc.

Minerals found in hard water build up in appliances such as hot water systems and dishwashers reducing their service life and making them less efficient. Soft water saves you money by replacing them less often and saves the environment by cutting waste.

A Softrol™ is best paired with a whole house filter for a complete filtration solution!

WH2-55

### Whole House Filtration

The WH2 is a dual filter system designed to remove sediment, chlorine, bad taste and odour from your mains water. This whole house filter is available in 1" & 1.5" connections and 30 to 60 Lpm models.
